# **Innovative Building Materials and Technologies**

# Introduction

The use of innovative building materials and technologies (IBMT), including materials, products, systems or technologies of construction, may enhance the safety, health and environmental performance of buildings, as well as productivity of the building industry. To facilitate the application of IBMT in private development projects, the Buildings Department (BD) has set up a pre-acceptance mechanism for IBMT with an aim to providing a curtailed assessment on non-site specific design and construction matters relating to building, drainage and structural IBMT (excluding innovative geotechnical materials and technologies)<sup>1</sup> for compliance with the safety, health and environmental standards set out in the Buildings Ordinance (BO) and its subsidiary regulations, so that the industry would have greater confidence in using IBMT for their projects.

# Pre-acceptance Mechanism

2. The supplier or manufacturer of IBMT is required to appoint an authorized person (AP), a registered structural engineer (RSE) and/or a registered geotechnical engineer (RGE)<sup>2</sup> as appropriate who should evaluate the IBMT for the purpose of compliance with the BO and its subsidiary regulations and submit a pre-acceptance application (PAA) to BD for consideration. The PAA should include the following:

- (a) an application form (Appendix A) duly completed and signed by the supplier or manufacturer and the appointed AP, RSE and/or RGE as appropriate;
- (b) an innovation brief providing the details of the IBMT (e.g. use, design principle and job reference (if any)) and highlighting the innovative content of the IBMT<sup>3</sup>;

/(c) ...

<sup>&</sup>lt;sup>1</sup> Suppliers/manufacturers of innovative geotechnical materials and technologies should approach the Geotechnical Engineering Office of the Civil Engineering and Development Department for their pre-acceptance of the geotechnical materials and technologies.

<sup>&</sup>lt;sup>2</sup> Appointment of an RGE is required if the IBMT involves geotechnical matters, e.g. new foundation system.

<sup>&</sup>lt;sup>3</sup> For example, concrete consists of innovative component as cement replacement or aggregates that will advance its performance, or there is currently no relevant local and international standard for the IBMT.

- (c) building, drainage or structural plans as appropriate to justify how the relevant standards and requirements under the BO could be met, or otherwise demonstrate the performance of the IBMT being equivalent or not inferior to the relevant standards and requirements under the BO; and
- (d) technical specification of the IBMT, together with the supporting documents including manufacturer's catalogue, technical documents, test or assessment reports prepared by accredited laboratories, quality assurance scheme of the manufacture factory with ISO 9001 or equivalent quality assurance certification, etc.

3. For the avoidance of doubt, the pre-acceptance mechanism is not applicable to the following:

- (a) building materials, products, systems or technologies that have already been accepted and shown in PNAPs (e.g. Modular Integrated Construction) and codes of practice issued by BD; and
- (b) building materials, products, systems or technologies that are already available in BD's Central Data Bank.

# Processing of PAA

4. On the condition that the PAA is accompanied with sufficient information, BD will provide a determination normally within 45 days from the date of receipt of the application in the form of a letter of in-principle acceptance if the IBMT is accepted in-principle for the proposed use. Otherwise, BD will provide a letter of comments on the application to AP/RSE/RGE also within 45 days. AP/RSE/RGE should clarify/respond to all comments in 30 days, or the application may be considered as abandoned. Upon receipt of the responses to comments and/or supplementary information from AP/RSE/RGE, BD will give a determination within 30 days. BD may refuse<sup>4</sup> the application with a list of outstanding items or remaining comments yet to be addressed if full response is not received or the responses cannot satisfactorily address BD's comments. To facilitate the preparation of the PAA, the applicant is encouraged to discuss with BD before submitting an application.

5. The letter of in-principle acceptance will state the requirements and limitations of the pre-accepted IBMT. The letter will also remind the supplier or manufacturer the statutory requirements of approval and consent for application of the IBMT in a development project, and specify whether it is suitable for use in minor works carried out under the simplified requirements of the Minor Works Control System. The letter together with the brief description, requirements and limitations of the pre-accepted IBMT will be uploaded to BD website for public reference.

/Adoption ...

<sup>&</sup>lt;sup>4</sup> If the application is refused, a new application as per paragraph 2 is required.

# Adoption of Pre-accepted IBMT in Private Developments

6. The pre-acceptance of the IBMT should not be construed as an exemption from obtaining prior approval and consent from the Building Authority under the BO. When a plan submission involves the use of pre-accepted IBMT, it should be accompanied with an application for modification/exemption under section 42 of the BO where appropriate. Nevertheless, the pre-acceptance is not a pre-requisite for the approval of plans involving IBMT.

7. Any building professionals who intend to adopt the pre-accepted IBMT in their development projects are responsible to ensure that the design and application of such IBMT in the project comply with the provisions of the BO, the approved plans as well as the requirements and limitations specified in the letter of in-principle acceptance.

8. To cater for advancement in technology and possible changes in requirements under the BO and its subsidiary regulations, codes of practice and PNAPs, the pre-acceptance of any IBMT will be subject to a validity period of maximum 5 years. Upon expiry, an application for renewal of the pre-acceptance prepared by AP, RSE and/or RGE as appropriate should be made in an application form (Appendix B) to ensure compliance with the latest requirements of the BO.
