

Central Data Bank List of Building Materials

A. General

Department:	Buildings
Type of building material:	Concrete admixtures
Applications:	For modifying the workability, rate of stiffening or hardening of concrete

B. Acceptance criteria**Testing standards:**

Testing of concrete admixtures should be in accordance with BS 5075 or other equivalent standards.

Conditions of Acceptance:

- Concrete admixtures shall comply with Building (Construction) Regulation 53 and should satisfy BS 5075.
- Application of a concrete admixture shall be strictly in accordance with the manufacturer's specifications/recommendations.

Reference List of Concrete Admixtures

Ref. No.	Product Name	Name of Manufacturer and Place of Manufacture (City and Country)	Material Category	Compliance Testing Standard	Details of Test or Assessment Report				Date of Posting on CDB	Remarks / Comments
					Name of Laboratory Accreditation Body	Name of Laboratory / Assessing Organization	Report No.	Date of Test / Assessment Report		
BD-CA 001	Conplast RP 264	Fosroc Construction Chemicals (See remarks)	Retarding water-reducing admixture	BS 5075: Part 1: 1974	N/A	Engineering Materials Research & Laboratories Ltd.	MTL/R/0299/84	January 1984	18/01/2005	No-objection letter issued in 1984. Updated information on place of manufacture to be provided by the manufacturer.
BD-CA 002	Conplast R	Fosroc Construction Chemicals (See remarks)	Retarding water-reducing admixture	BS 5075: Part 1: 1974	N/A	Engineering Materials Research & Laboratories Ltd.	MTL/R/0299/84	January 1984	18/01/2005	No-objection letter issued in 1984. Updated information on place of manufacture to be provided by the manufacturer.
BD-CA 003	Conplast 211	Fosroc Construction Chemicals (See remarks)	Normal water-reducing admixture	BS 5075: Part 1	N/A	Engineering Materials Research & Laboratories Ltd.	MTL/R/3699/84	August 1984	18/01/2005	No-objection letter issued in 1984. Updated information on place of manufacture to be provided by the manufacturer.
BD-CA 004	Conplast P 509	Fosroc Construction Chemicals (See remarks)	Retarding water-reducing admixture	BS 5075: Part 1	N/A	Engineering Materials Research & Laboratories Ltd.	MTL/R3698/84	August 1984	18/01/2005	No-objection letter issued in 1984. Dosage used should be at least 0.3 litre per 100kg of cement, the retarding effect at lower dosages should be ascertained by practical site trials, at ambient temperatures and with the actual cements to be used. Updated information on place of manufacture to be provided by the manufacturer.
