

## Foreword

Fire safety in buildings is determined by a number of factors: the provisions of means of escape in case of fire, the ability for a building to resist the effects of fire and to minimize the spread of fire and smoke and the provision of means of access to enable firefighters to effect rescue and fight fire.

Following a review of the Code of Practice for the Provision of Means of Escape in Case of Fire 1996, the Code of Practice for Fire Resisting Construction 1996 and the Code of Practice for Means of Access for Firefighting and Rescue 2004, this Code of Practice is issued to replace the said three Codes of Practice and to provide guidance on compliance with the requirements laid down in the Building (Construction) Regulation 90 and the Building (Planning) Regulations 41, 41A, 41B, 41C and 41D, which include the requirements for fire resisting construction, means of escape and means of access for firefighting and rescue to buildings. In addition, it also provides guidelines on the testing standards for the fire properties of building elements and components, fire safety management of buildings and the alternative approach in fire safety design, i.e. fire engineering approach.

This Code of Practice may be cited as the Code of Practice for Fire Safety in Buildings. It is prepared and issued by the Buildings Department on the basis of the consultancy study on fire engineering approach and fire safety in buildings. The consultancy study was conducted by Ove Arup & Partners Hong Kong Ltd commissioned by the Buildings Department and was supervised by a Steering Committee comprising representatives of professional institutions and other stakeholders of the building industry as well as other Government Departments. Composition of the Steering Committee is as follows:

### Steering Committee:

Chairman	: Assistant Director/Corporate Services	Buildings Department	
Members	: Chief Building Surveyor/Legal Services	Buildings Department	
	: Chief Building Surveyor/New Territories East 2 & Rails	Buildings Department	
	: Chief Building Surveyor/Fire Safety	Buildings Department	
	: Chief Structural Engineer/F	Buildings Department	
	: Senior Building Surveyor/Legislation	Buildings Department	
	: Deputy Chief Fire Officer (Fire Safety)	Fire Services Department	
	: Senior Architect/Independent Checking Unit	Housing Department	
	: Senior Building Services Engineer	Architectural Services Department	
		Professor of the Hong Kong Polytechnic University	
		Professor of the Hong Kong University of Science and Technology	
	Representatives of the Hong Kong Institute of Architects		
	Representatives of the Hong Kong Institution of Engineers		
	Representative of the Hong Kong Institute of Surveyors		
	Representative of the Real Estate Developers Association of Hong Kong		
Secretary	: Building Surveyor/Legislation	Buildings Department	

This Code of Practice will be reviewed regularly. The Buildings Department welcomes suggestions for improving the Code.

First issue : September 2011

Last revision : April 2012

This revision : October 2015

# Contents

	<b>Page</b>
<b>Part A – Introduction</b>	
Section 1 – General	
A1 Use of this Part	2
A2 Fire Safety Objectives	3
A3 Compliance	4
A4 Parts in this Code	5
A5 Change in Use or Bounding Conditions	6
A6 Limitation of this Code	6
A7 Use Classification	7
Section 2 – Performance Requirements	
A8 Means of Escape	11
A9 Fire Resisting Construction	12
A10 Means of Access	14
A11 Fire Safety Management	15
Section 3 – Definitions	16
Diagrams	20
<b>Part B – Means of Escape</b>	
Section 1 – General	
B1 Use of this Part	23
B2 Performance Requirements for Means of Escape	23
B3 Application	23
Section 2 – Provisions of Means of Escape	
B4 Assessment of Occupant Capacity	25
B5 General Requirements of Exit Routes	28
B6 Buildings with Only One Required Staircase	31
B7 Exits from Rooms and/or Fire Compartments	32
B8 Exits from Storeys	33
B9 Exits at Ground Storey	35
B10 Access to Required Staircase(s) within a Building	35
B11 Travel Distance	37
B12 Discharge Value and Width of Required Staircase	40
B13 Doors in Relation to Exits	42
B14 Construction of Required Staircases	44

	<b>Page</b>	
B15	Ramps	45
B16	Lift Lobbies	45
B17	Basements	45
B18	Refuge Floors	46
Section 3 – Special Provisions on Means of Escape for Use Classification 5a		
B19	Application of this Section	50
B20	Site Requirements	50
B21	Exit Requirements for Use Classification 5a	52
B22	Exits, Notices etc.	54
B23	Required Staircases	55
B24	Barriers	55
B25	Exit Route Details	56
B26	Exit from Stages	57
B27	Cinemas in Multi-storey Buildings	57
B28	Temporary Buildings	61
Section 4 – Provisions of Means of Escape for Persons with a Disability		
B29	Application of this Section	63
B30	Temporary Refuge Spaces	64

## **Part C – Fire Resisting Construction**

### Section 1 – General

C1	Use of this Part	75
C2	Performance Requirements for Fire Resisting Construction	75

### Section 2 – Provisions for Fire Resisting Construction

C3	Fire Compartmentation	76
C4	Fire Compartment Limitations and Fire Resistance Rating	76
C5	Prevention of Fire Spread between Buildings	80
C6	Protection of Flats in Use Classification 1 and 2	81
C7	Separation between Use Classifications	82
C8	Openings through Fire Barriers and Vertical Shafts	83
C9	Protection of Required Staircases and Lifts	85
C10	Protection of Openings between Floors	88
C11	Protection against External Fire Spread	89
C12	Protection of Roofs	90
C13	Protection of Areas of Special Hazard	91

	<b>Page</b>	
C14	Protection of Basements	93
C15	Linked Buildings	94
C16	Fire Rated Doors	95
C17	Protection for Refuge Floors at Intermediate Floors	97
Section 3 – Fire Safety Provisions for Cinemas and Theatres		
C18	Fire Safety Provisions for Cinemas and Theatres	99
	Diagrams	100
<b>Part D – Means of Access</b>		
Section 1 – General		
D1	Use of this Part	111
D2	Performance Requirements for Means of Access	111
Section 2 – Provision of Access Staircase, Fireman’s Lift and Firefighting and Rescue Stairway		
D3	Number of Access Staircases, Fireman’s Lifts and Firefighting and Rescue Stairways	112
Section 3 – Access Staircase		
D4	Required Staircase as Access Staircase	115
D5	Fighting and Rescue Stairway as Required Staircase	115
Section 4 – Fireman’s Lift		
D6	Designation of Fireman’s Lift	116
D7	Access to a Fireman’s Lift at Ground Level	116
D8	Floors Served by a Fireman’s Lift	117
D9	Liftwell of a Fireman’s Lift	118
D10	Lift Car of a Fireman’s Lift	118
D11	Lobby to a Fireman’s Lift	118
D12	Doors of a Fireman’s Lift	119
D13	Control and Operation of a Fireman’s Lift	119
Section 5 – Firefighting and Rescue Stairway		
D14	Access to a Firefighting and Rescue Stairway at Ground Level	120
D15	Floors Served by a Firefighting and Rescue Stairway	121
D16	Access to a Floor from a Firefighting and Rescue Stairway	122
D17	Protection of a Firefighting and Rescue Stairway	124
D18	Construction of Access Staircase in a Firefighting and Rescue Stairway	125
D19	Ventilation of Access Staircase in a Firefighting and Rescue Stairway	125

	<b>Page</b>	
D20	Fireman's lift in a Firefighting and Rescue Stairway	126
D21	Mechanical Ventilation of a Firefighting and Rescue Stairway	126
Section 6 – Provision of Emergency Vehicular Access		
D22	EVA to Virgin Sites	127
D23	EVA to Redevelopment Sites	128
D24	EVA Signs	129
D25	Exemption and Modification	130
D26	Enhanced Fire Safety Measures	132

## **Part E – Fire Properties of Building Elements and Components**

### Section 1 – General

E1	Use of this Part	147
E2	Scope	147

### Section 2 – Loadbearing Elements

E3	Fire Tests for Loadbearing Elements	148
----	-------------------------------------	-----

### Section 3 – Non-loadbearing Elements

E4	Fire Tests for Non-loadbearing Elements	149
----	---	-----

### Section 4 – Protection of Openings in Fire Barriers

E5	Openings in Fire Barriers (Doors, Windows, Shutters and associated Penetrations)	150
E6	Openings in Fire Barriers (Ventilation Ducts and associated Penetrations)	151
E7	Openings in Fire Barriers (General Penetrations)	152
E8	Fire and Smoke Dampers	153
E9	Smoke Leakage for Doors with Smoke Seal	154

### Section 5 – Non-combustibility

E10	Non-combustibility	155
E11	Limited Combustibility	155
E12	External Facades	157
E13	Internal Wall and Ceiling Linings and Decorative Finishes	157
E14	Floor Linings and Floor Coverings	159
E15	Acoustic and Thermal Insulation in Ducts	160

### Section 6 – Fire Testing Authorities

E16	Criteria for Choosing Testing Authorities	161
-----	---	-----

Reference – List of Tables		162
----------------------------	--	-----

<b>Part F – Fire Safety Management</b>	
Section 1 – General	
F1            Use of this Part	170
F2            Performance Requirements for Fire Safety Management	170
F3            Scope	170
Section 2 – Fire Safety Management	
F4            Fire Safety Management	172
Section 3 – Maintenance Plan	
F5            Maintenance Plan	174
Section 4 – Training Plan	
F6            Training Plan	178
Section 5 – Fire Action Plan	
F7            Fire Action Plan	179
Appendix F1 – Sample Checklist on Housekeeping	180
 <b>Part G – Guidelines on Fire Engineering</b>	
Section 1 – Introduction	
G1.1        Use of this Part	184
G1.2        Objectives of this Part	184
G1.3        Limitations of this Part	184
Section 2 – Framework for Fire Engineering	
G2.1        Performance Requirements and Level of Safety	185
G2.2        Complying with the Framework for Fire Engineering	185
G2.3        Evaluation Criteria on Guidance to Performance Requirements	188
Section 3 – Introduction to Fire Engineering	
G3.1        Introduction	192
G3.2        Relevant Considerations	192
G3.3        Application	193
G3.4        Safety Margins and Safety Factors	193
Section 4 – Methodologies of Fire Engineering	
G4.1        Introduction	195
G4.2        Complying with the Performance Requirements	195
G4.3        Assessment Methodologies	195
G4.4        Reference	197

	<b>Page</b>
Section 5 – Fire Safety Sub-systems	
G5.1 Introduction	198
G5.2 Sub-systems – Description of Principles	199
Section 6 – Design by Fire Engineering	
G6.1 Application of Fire Engineering at Different Stages	206
G6.2 Fire Engineering Process	206
G6.3 Pre-submission Enquiry	207
G6.4 Assessment Approaches	207
G6.5 Design Fires	208
G6.6 Smoke Control	216
G6.7 Occupant Movement	217
G6.8 Tenability Criteria	219
Section 7 – Fire Safety Assessment Report (FSAR)	
G7.1 Framework of FSAR	221
G7.2 Assessment of Structural Performance	223
G7.3 Commissioning and Field Testing	224
G7.4 Maintenance and Management	224
Section 8 – Bounding Conditions	
G8.1 Definition	225
G8.2 Application	225
G8.3 Example of Information for Bounding Conditions	226
Section 9 – Computer Models	
G9.1 Introduction and Overview	227
Section 10 – References	228
<b>Annex A – List of Codes of Practice and Guides issued by Licensing Authorities for Licensed Premises</b>	<b>230</b>
