Dear Sir/Madam,

**Deletion of PNAP 25
on Transformer Rooms, Building (Planning) Regulation 15**

Upon review we note that PNAP 25 is no longer required and is hereby withdrawn. I wish to advise that both China Light and Power Ltd. and HK Electric Co. Ltd. have published Code of Practice/Guidelines on the design and planning of electrical substation. You may wish to make reference to these publications in the design stage of a building to avoid difficulties in finding a suitable location later.

Yours faithfully,

(LAM Siu-tong)
Assistant Director/Support
for Director of Buildings
