Dear Sir/Madam,

### **Mosquito Prevention and Control Measures in Construction and Demolition Sites**

I write to draw your attention to the alarming mosquito infestation situation recently. In view of the serious situation, it is necessary to take actions to tackle the mosquito infestation and prevent the transmission of dengue fever.

To safeguard public health, I appeal to your sustained effort to carry out effective mosquito prevention and control measures in construction and demolition sites. The “Guidelines on Mosquito Prevention for Contractors of Construction Sites”<sup>1</sup> issued by the Food and Environmental Hygiene Department offers good advice on appropriate measures against mosquito breeding in the construction sites. Please take appropriate actions promptly to strengthen mosquito prevention and control during the hot and rainy summer.

Yours faithfully,

( TAM Wing-cheung )  
Assistant Director/Corporate Services  
for Director of Buildings
