

### Posting of Names on Building Sites

There has been much public concern over the safety of building sites in the wake of the collapses in recent years.

2. To enable members of the public and government departments to bring to the attention of authorised persons and registered structural engineers (AP and RSE) possibly unsafe conditions on building sites, you are requested to give relevant information to facilitate contact. Please post your name, title as AP or RSE, and office contact telephone numbers in a prominent position on site.

3. This should help you so that you may take any early remedial action necessary to remove danger or nuisance. Your co-operation is appreciated.

4. A similar practice note has been issued to registered contractors.
