

Certification of Plant Operators for Lifting Appliances and Lifting Gear

On 24th July 1994, new legislation will come into force which requires that all lifting appliances and lifting gear shall be operated only by persons who have been appropriately trained and have the relevant and current certificate in the attached format, issued by the Construction Industry Training Authority or such other authority as may be approved by the Commissioner for Labour.

2. Failure to comply will be an offence under the Factories and Industrial Undertakings Ordinance, Cap. 59. You should therefore ensure that all plant operators under your control receive the necessary training and obtain a certificate. Please do so in good time : leaving training to the last moment may result in putting too many candidates to the training authorities just before the effective date.
