Layman’s Guide on Compliance with Fire Safety Directions

1. Receive Directions from Buildings Department (BD)
   - Read the Directions carefully
2. Arrange fire safety improvement works
   - 1 year of compliance period for common areas in general
   - 6 months of compliance period for individual premises in general
3. Select registered building professionals
   - Browse the list of Authorized Persons / Registered Structural Engineers on the BD’s website
   - Liaise with other owners / Owners’ Corporations
   - Select registered building professionals through tenders / “Smart Tender” under Urban Renewal Authority
4. Ascertain scope of service
   - Scope of inspection
   - Recommendations on the required fire safety construction and demolition works (if necessary)
   - Application for approval of alterations and additions works (if necessary)
   - Supervision of the fire safety improvement works
5. Confirm fire safety improvement works
   - Liaise with other owners / Owners’ Corporations to confirm such as the location for installing a fire service water tank
   - In case of technical difficulties, submit alternative proposal for fire safety improvement works to BD
6. Select registered contractors
   - Browse the list of registered contractors on the website of BD
   - Select registered contractors through tenders / “Smart Tender” under Urban Renewal Authority
7. Carry out fire safety improvement works
   - Ensure registered building professionals supervise the fire safety improvement works
8. Confirm completion
   - Inform BD upon completion of works
   - Submit copies of certificates / test reports / assessment reports for fire rated doors, fixed lights and fire rated enclosures, etc.
9. Enquiry and Report
   - Refer to the back cover of this Guide

Note: Fail to complete works within specified period
   - Apply in writing to BD for an extension of time with supporting documents such as:
     - minutes of meeting of Owners’ Corporation
     - tender documents
     - works schedule
     - tenancy agreement
     - evidence of works commencement

The Buildings Department and the Fire Services Department are the enforcement authorities of the Fire Safety (Buildings) Ordinance (Cap. 572). They will separately issue Fire Safety Directions under the Ordinance according to their respective purviews.

Typical Fire Safety Construction Improvement Works

Replacement of fire rated doors* for escape staircases

- **A typical fire rated door**
  - Door Closer
  - Stainless Steel Hinges
  - Min. height 2000mm
  - Min. width 750mm
  - No excessive gap
  - Vision Panel (if applicable)

* The design details of different brands of wooden or glass fire rated doors may vary but they should be constructed in accordance with all requirements, including dimensions, ironmongery works and intumescent strip, as stipulated in the test reports before it can be accepted.

Fire rated doors should have the required fire resistance period and should not obstruct the escape route.

- **Exempted Building Works**
  - Recommend to appoint a Registered Building Professional to follow up

Enclosures for services in escape staircases

- **Before**
- **After**

Services inside escape staircases, e.g. electrical cables and meters, should be enclosed by fire rated materials to prevent the spread of fire from such services. No enclosures are required for optical fiber wires, water valves and water meters.

Replacement of windows in escape staircases

- **Before**
- **After**

Fixed lights with fire resistance period of not less than half an hour shall be provided to prevent the spread of fire from the windows of adjoining buildings or other windows of the same building.

- **Minor Works**
  - Appoint a Prescribed Registered Contractor and a Prescribed Building Professional (if applicable)
