

**Summary of Decisions of the Building Committee**  
**Building Committee I 16/2022 held on 3.5.2022**

(a) BCI 1 16/2022

Issue : Non-provision of service lane.

Decision : The committee noted that there was no existing lane in the vicinity and a lane pattern would unlikely be created in future. Having considered the layout of the proposed building and the site environment, the committee agreed the non-provision of service lane.

(b) BCI 2 16/2022

Issue : Sewage system projecting under street.

Decision : Having regard to the circumstance of the case, the committee had no objection in-principle to permit the proposed sewage system to be built under street subject to no adverse comment from relevant departments.
