E. Other Matters

1. If the validation involves unauthorised signboard erected at the exterior or other common parts of the building, the signboard owner should pay attention to the relevant conditions in the deed of mutual covenant of the building and obtain consent from the co-owners or owners' corporations of the building in particular before the commencement of the strengthening works (if any). Otherwise, the signboard owner may have to bear the civil liabilities for failure to do so.
2. The signboard owner undertakes in Part A6 to maintain the signboard in a structurally safe condition at all times. This includes any timely safety inspection and repair for damage due to typhoon or inclement weather.
3. Prescribed registered contractor shall take appropriate measures to ensure construction wastes are disposed of properly.
4. To minimise light pollution and reduce energy consumption arising from the lighting of the signboards, the AP and the applicant are advised to make reference to the Guidelines on Industry Best Practices for External Lighting Installations jointly issued by the Environment Bureau (ENB), Environmental Protection Department and Electrical and Mechanical Services Department, which can be downloaded from the ENB's website:
